*Prices mentioned are excluding VAT. VAT will be added where applicable.

Delivery specifications

1. All tracks to be delivered in WAV or AIF format.
Sample rate of 44.1Khz or higher.
Bit depth of 16, 24 or 32 bit (24+ preferred).
No dithering.
2. **Important:** without limiting on -3dB.
Heavy limiting will result in less headroom for mastering. Peaks cut off by limiting can never be restored in the mastering process thus affecting output quality greatly.

3. Tracks to be delivered to FTP preferably 7 days in advance. I will set up a private FTP account for you.
